THE
NOMAD

BIOGRAPHY

Siku the Nomad is a Lebanese-Canadian experimental producer and DJ who bridges electronic intricacy with the organic pulse of global rhythms, tapping into the primal dance instinct that unites us all. For him, music is more than sound—it's a tool to nourish and expand rave culture, a shared language of movement and connection.

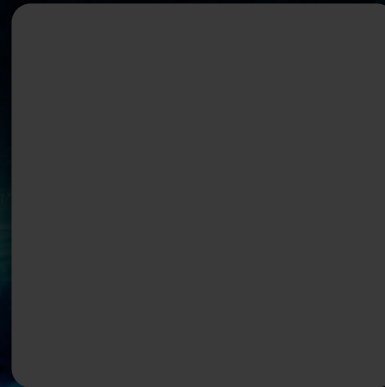

Having spent most of his life travelling, his sets transcend genre and geography, thriving in outdoor festivals, underground scenes, and intimate clubs. Always prioritising connection, reading the crowd, and amplifying shared energy into a collective experience, where melody captivates the mind, groove ignites the body, and storytelling resonates with the soul.
